

BARNETT SHALE WELL RESEARCH ANALYSIS©

Exclusive to the Powell Barnett Shale Newsletter

Total Production To January 1, 2007

Powell & Company has completed research for the *Powell Barnett Shale Newsletter* on the Barnett Shale production in the Fort Worth Basin to January 1, 2007. The totals include all **twenty (20) producing counties and the seventeen (17) fields** designated by the *Railroad Commission of Texas* (RRC) including the *Newark East (Barnett Shale) Field*. Production from the Pending file of the RRC is included in the county totals. The results from **June 1, 1982 to January 1, 2007**, show that **6,281** wells have produced **2,533,977,715 MCF gas** (**2.533 trillion cubic feet of gas**) + **8,565,888 barrels oil** (condensate). There were **6,060 wells active in December, 2006**, of the **6,281 wells that contributed to the total**. Those **6,060 active wells** produced **67,330,563 MCF gas** (**67.3 billion cubic feet of gas**) in **December, 2006**.

BARNETT SHALE PRODUCTION, FORT WORTH BASIN To Jan 1, 2007 by Powell & Company 3/18/2007
